

Light up your life with solar!

Adding ambient light to your outdoor spaces should be easy. Why go through the hassle of wiring electricity when you can utilize **self-contained, long-lasting, solar-powered lighting**?

By collecting solar energy throughout the day – **every day** of the year – each light will store the electrical energy until darkness falls, when the lights **automatically turn on**. Depending on how much sunlight is available, the lights can last straight through **until dawn**. With **five colours** to choose from, you can personalize the lighting to your exact tastes. **Light up your life with SunTap Technologies!**

Highlights and uses:

- ◆ Solar-powered LED, bright to **300+ metres** away
- ◆ Tempered-glass shell is **highly durable**: imbed into sidewalks or drop in pool for night-time illumination
- ◆ Environmentally safe and free from maintenance
- ◆ Use as night light: great for **all members** of the family
- ◆ Garden feature: light up your **yard** all year round (operates from -20 °C to +70 °C)
- ◆ Keep your **dock safe** at night by illuminating edges
- ◆ 5-year warranty and even longer lifetime
- ◆ Available in the **five** following colours: red, green, blue, amber, and clear
